

Stop, Wait, Think before you flush

Millions of pounds are spent on cleaning drains and sewers across the United Kingdom due to items that should not be in there e.g. nappies, dental floss, wet wipes.

Items such as nappies and wet wipes do not simply disappear down the u-bend and dissolve. In fact, they can end up clumping together which causes disturbance within the sewers, leading to flooding.

A bin in the bathroom will stop the temptation of flushing items that shouldn't be flushed down the toilet.

Stop, Wait, Think before you flush – is it poo, pee or toilet paper?

FLUSH IT

Poo
Pee
Toilet Paper

BIN IT

Nappies	Sanitary Products
Baby Wipes	Cat Litter
Dental Floss	Cooking Grease
Cotton Buds	Condoms
Pets (goldfish etc)	Medication
Hairballs	Face Wipes
